

## Pigment Printing (Inkjet)

I only have a small printer in studio these days... The Canon Pixma Pro-1. Pigment prints up to 13" wide, great for color work, and with five neutral inks it also really excels at B&W output. I stock a wide variety of papers, and I can price out others on request. Charges are by paper size, and keep in mind that this printer needs a bit of a margin, so prints can't be full bleed. I'm happy to manage other printing solutions for you, such as large format inkjet or light jet, with trusted partners.

BRAND	TYPE	8.5"x11"	11"x17"	13"x19"	NOTES
<b>Canon</b>	Photo Paper Pro Luster	\$10	\$18	\$24
